

MEDIKRO SpiroSafe

Disposable Flow Transducer

- ▶ No Filters
- ▶ Patient Safety
- ▶ Cost-effective & Ecological
- ▶ Easy Twist-to-Connect

Product Code: M9256

Medikro® SpiroSafe disposable flow transducer is a disposable pneumotach. Every single SpiroSafe flow transducer is individually verified for accuracy, enabling best spirometry results.

Medikro® SpiroSafe is designed to improve performance of the spirometer and safety of spirometry tests. Using SpiroSafe is cost effective and ecological. With SpiroSafe there is no need to use bacteria filters or additional cardboard mouthpieces. SpiroSafe helps to protect the environment producing up to 78% less waste than standard bacteria filters.

SpiroSafe Highlights

Easy Twist-to-Connect

Medikro "Twist-to-Connect" makes attaching and removing the SpiroSafe flow transducer easy and fast, and enables a reliable and secure connection.

No Filters

Medikro SpiroSafe is a single patient use disposable flow transducer. With SpiroSafe there is no need to use bacteria filters, or perform sterilization.

Safe to Use

SpiroSafe is a single patient use device, which will reduce the cross-contamination risk, and it also protects the spirometer since no exhaled air gets into the device.

VCT

Vibration Control Technology improves and stabilizes the quality of the collected test signal, improving the overall spirometry quality.

Cost Efficient

Medikro SpiroSafe can be changed in a matter of seconds, and the whole system is clean and ready for the next patient.

Environmentally Friendly

SpiroSafe helps to protect the environment producing up to 78% less waste than standard bacteria filters.

Compatible With

MEDIKRO® Pro
Product code: M9488

MEDIKRO® Nano
Product code: M9487

MEDIKRO® Primo
Product code: M9492
